

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) An article comprising

a substrate plastic card configured to have magnetic information stored thereon; and
an invisible symbol on the substrate plastic card,

wherein the invisible symbol is formed by a compound which includes a cyano group
and has an infrared absorption wavelength apart from that of the substrate plastic card when
heated.

2. (Original) The article of claim 1, wherein the compound has a polymer containing
a cyano group.

3. (Cancelled)

4. (Original) The article of claim 1, wherein the compound emits infrared light when
heated to 50 degree in Centigrade or more.

5. (Original) The article of claim 1, wherein the invisible symbol is a barcode having
minimum bar width about 250 micro-meter.

6. (Original) The article of claim 1, wherein the wavelength of infrared emission is
around 4.5 micro-meter.

7. (Currently Amended) The article of claim 1, wherein the invisible symbol is
printed on the substrate plastic card using a laser beam printer.
